Unfortunately there is something wrong with my faceapi resource used before for my project that I could not get the report for that.

Reflection

I have learned a lot from the project which took me a really long time.

No permission to create video indexer resource

It took me a while to figure this out since the instruction from the course material is out of dated.

The permission creating custom form recognizer project

> "Error: Check if you have unexpired read/write/list/delete permission to blob container/blob,"
> After trying all the methods listed in this [Q&A page](#) from Microsoft helpful.

Excercises are important

The excercises from the courses are important to follow which will make the final project more easier and smoother.
